

FT260 I2C Sensor Demo in C#

FT260 is a HID-class USB to I2C/UART interface Device Controller with the following advanced features:

- ❖ Single chip USB to UART/I2C bridge with standard Human Interface Device (HID) class support.
- ❖ USB2.0 compliant Full Speed device with entire USB protocol handled on the chip.
- ❖ Supports 2 USB HID Interfaces, each corresponding to the on-chip physical interfaces, I2C and UART.
- ❖ Pin configuration of enabling HID interface for variety of applications.
- ❖ HID over I2C specification support.
